

ChatMessage::setId

```
graph LR; A[ChatMessage::setId] --> B[ChatMessage::idChanged]; B --> B;
```

The diagram illustrates a state transition or event handling process. It consists of two rectangular boxes. The first box, on the left, is shaded gray and contains the text 'ChatMessage::setId'. A straight blue arrow points from the right side of this box to the left side of a second box. The second box, on the right, is white with a black border and contains the text 'ChatMessage::idChanged'. A curved blue arrow originates from the top of the second box and points back to the top of the same box, indicating a self-loop or a recursive call.

ChatMessage::idChanged
