

MenuItem::setAvailable

```
graph LR; A[MenuItem::setAvailable] --> B[MenuItem::availableChanged]; B --> B;
```

The diagram illustrates a sequence of events. It begins with a gray rectangular box containing the text 'MenuItem::setAvailable'. A straight blue arrow points from the right side of this box to the left side of a white rectangular box with a black border. This second box contains the text 'MenuItem::availableChanged'. From the top right corner of the white box, a curved blue arrow loops back to the top left corner of the same box, indicating a self-loop or a recursive call.

MenuItem::availableChanged
